UNIVERSITY OF WISCONSIN-MADISON

Are you a healthcare worker?

Have you recently needed to be tested for COVID-19?

Evaluating SARS-CoV2 Vaccine effectiveness Among health care personnel During Early phase vaccination

- The purpose of this research study funded by CDC is to evaluate the effectiveness of SARS-COV2 vaccines in preventing COVID-19 infection in healthcare workers and to learn how these vaccines work in a real life setting before the widespread distribution to the general public.
- We invite any employee (including volunteers) in a participating hospital who has recently been tested for COVID-19 to participate.
- Those who choose to participate will be asked to complete a survey (online or via phone) approximately 14 days after the time of COVID test. You will receive a \$15 stipend as a thank you for completing the study survey.
